

The pdvWIRELESS Partner Program is uniquely positioned to help dealers and agents. Our goal is to help our partners grow in the evolving Push-to-Talk marketplace and offer new solutions to their customers with the DispatchPlus application. With national coverage, a network dedicated solely to business, end-to-end communication, competitive rate plans and industry-leading Motorola radios or the option for businesses to bring their own devices, our Push-to-Talk solutions help solve the specialized communication needs for dispatch-centric businesses in virtually every industry.

Including:

- Automotive & Towing
- Construction
- Delivery & Distribution
- Education
- Energy
- Government
- Non-Emergency Medical Transport
- Security
- Transportation
- Waste Management

We offer opportunities for dealers, sales agents and referral partners. While our current solutions are state-of-the art, we are continually evolving existing products and exploring exciting new technologies that help our dealers enhance their service offerings and increase sales.

The pdvWIRELESS Partner Program provides unrivaled support, marketing resources and industry leadership in helping your business grow and succeed.

Partner Program Benefits

Commission

Aggressive commission structure providing substantial payouts and long term residuals. Compensation can be augmented by bonus payments and short-term performance based incentives.

Sales Support

Assist with live web presentations, demos and sales support for deployment and training.

Marketing and Training Support

Onsite and web-based sales training by experienced sales executives. Web portal with presentations, datasheets, case studies, ROI calculations and product videos.

Customer Support

Specialists to assist with deployment and support for large accounts. Personalized phone and e-mail support.

Industry Support

Our team can help your customers solve their communication challenges in virtually every industry including waste management, construction, field services, transportation, distribution, government and education.

Add value and ROI to your customers' business with DispatchPlus.

DispatchPlus and industry-leading MOTOTRBO radios deliver one-touch PTT features that help your customers do more with less.

DispatchPlus®, our cloud-based workforce management solution, delivers both reliable PTT communications and high-productivity features designed specifically for dispatch-centric operations. This two-in-one solution can help your customers solve time-consuming challenges in virtually every industry.

Running on pdvWIRELESS' national, two-way radio network designed exclusively for business, DispatchPlus helps ensure seamless communications so business continuity is never compromised. Combined with rugged Motorola MOTOTRBO radios, your customers get a robust solution to stay connected...even in the most demanding environments.

Why DispatchPlus

DispatchPlus can help you differentiate your business with a solution that solves your customer's critical communication problems. DispatchPlus opens the door to speak to new prospects and re-engage current customers on a whole new level because it offers instant visibility into their employees – they can see where they are and where they have been.

DispatchPlus is for end-to-end communication needs.

Monitor and dispatch workers more easily with an easy-to-view map.

Increase productivity of mobile workers with status updates and voice notes with location, date and time stamps.

Minimize driver distraction and safety issues with one-touch communications.
